

Quadratic-normalized orbit-response residual

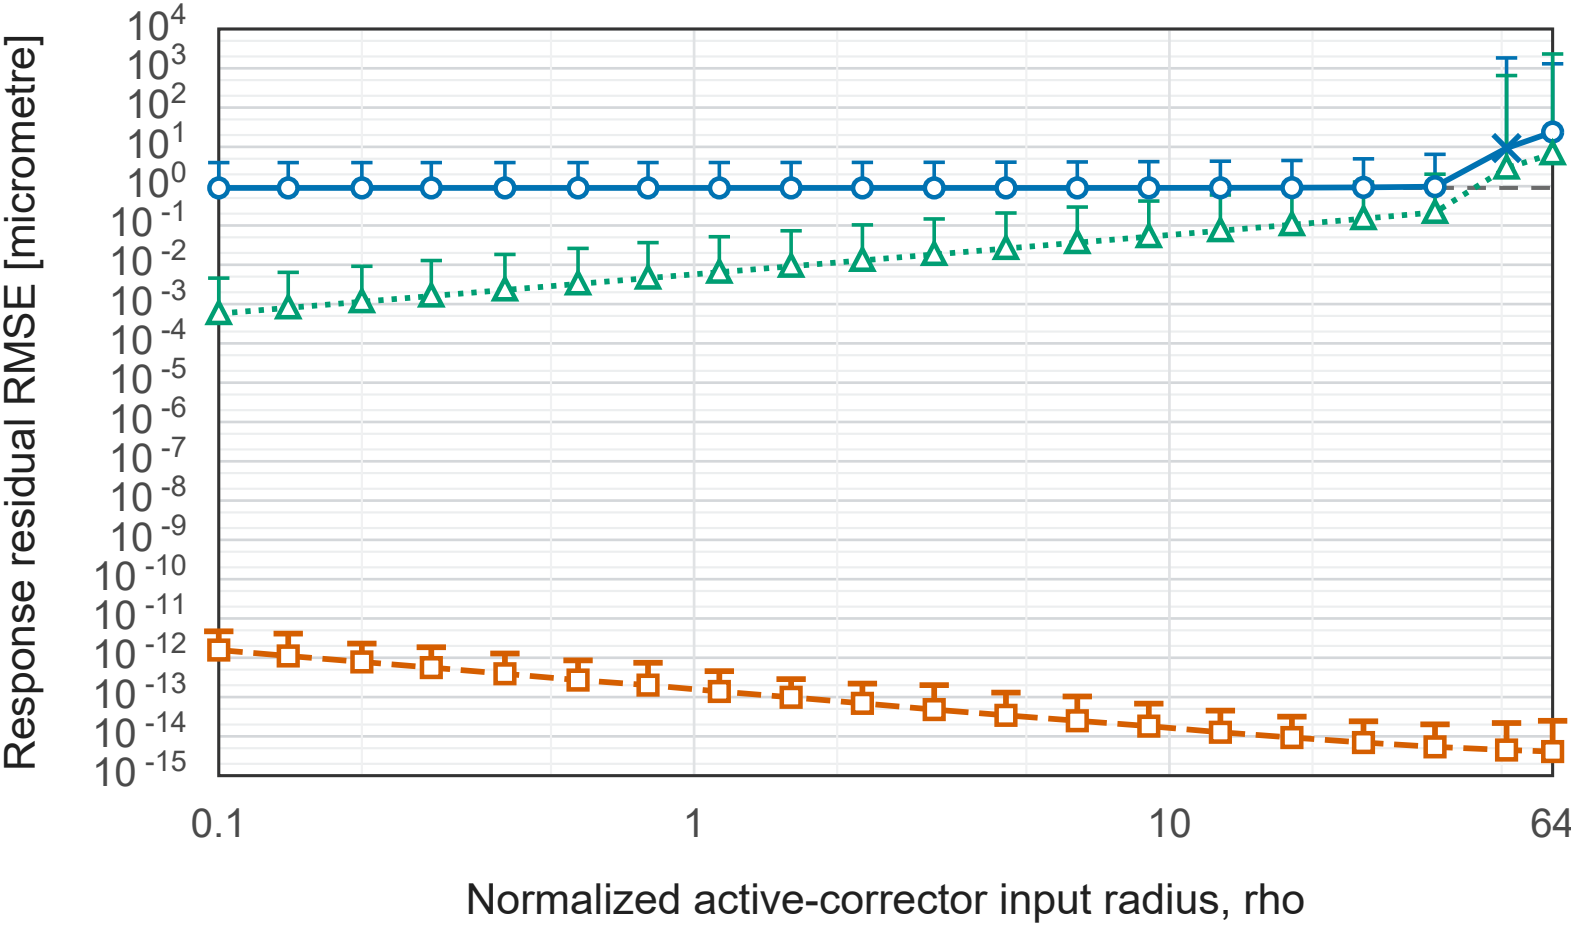

CESR RF-on; gtpsa response; 600 directions/scale; rho = 1: 5 microrad active-control RMS

—○— All controls (103) —□— Horizontal only (58) ...△... Vertical only (45)
- - - Pure quadratic-error reference × Incomplete exact reference

(a) Horizontal detector orbit

(b) Vertical detector orbit

Markers and lines: mean over trials; one-sided whiskers: maximum over trials.
